---

## **Projects**

**BeerMe** | [beer-me-react.herokuapp.com](http://beer-me-react.herokuapp.com)

*Visual tool for navigating through the Bay Area's collection of micro breweries. This mobile friendly web app allows users to upload beers, navigate through the beer and brewery Database, write reviews and create their own tasting profile.*

- BeerMe was written with React, Redux, Node, Express, PostgreSQL, Mocha & Chai, and Semantic-UI.
- Separate backend written in Python using Flask.
- Worked on a team of two practicing git workflow and agile methodologies.
- Applied React and Redux skills, created a fully secure deployed website that encompassed all knowledge of full stack web development.

## **Benetrkr**

*Web tool that aims to help those with disabilities who want to work, but are uncertain about the impact that their earnings will have on their Social Security benefits.*

- Provides an intuitive responsive web app that empowers the individual to alleviate this uncertainty.
  - Worked on a developer team of ten. Practiced agile methodology and git work flow with a large team.
  - Gained experience with a large team developing software, communicating, and collaborating.
  - Technologies include React, Redux, Node, Express, postgresSQL, Travis CLI, Heroku and more.
- 

## **Experience**

July 2018 - present

### **Web Development Resident**

*Stripe (through Galvanize) - San Francisco, CA*

- Facilitated web-development education for Stripe employees with Ruby, Javascript, HTML & CSS.
- Coached students in practicing pair programming and philosophy of being a developer.

Mar 2010 - Jun 2017

### **Assistant General Manager/Social Media Director**

*SALT the Bistro - Boulder, CO*

- 150% increase in following and engagement of restaurant group's social media presence.
  - In under five years promoted from busy-boy to Asst. GM.
  - Gained leadership, interpersonal and management skills.
- 

## **Education**

2018

### **Galvanize Full-Stack Web Development Immersive**

- 1000+ hr web development program with an emphasis on group and project based learning.
- Created multiple full stack apps in Javascript and Python, worked on a dev team, and contributed to open source projects.
